World's Finest Daffodils

1952

Listed herein we offer the FINEST in Daffodils, 1058 varieties including 127 outstanding new varieties brought in from abroad last year. All varieties on this list may be seen growing at our Nurseries in Gloucester and Mathews Counties, Virginia. PRICES, especially on most novelty types have been considerably reduced, and are for TOP size double nosed bulbs. (do not be led astray by cheap offers which are usually for small inferior bulbs). All are guaranteed true to name and are Certified by the State Entomologist and his Inspectors as free from disease. The grower of these outstanding varieties has had many years experience with Daffodils, which include 20 years as farm manager for one of the Largest Dutch growers of fine daffodils.

Virginia grown Daffodils, planted in the North bloom two to three weeks earlier than those grown in the cooler Northern climate. Flowering this much earlier they have a chance to develop slowly and fully while the weather is still cool. This is important with the highly colored reds, oranges and especially so with the pinks and many delicate shadings that are seldom seen when flowers open late in the season during warm bright weather.

Digging of bulbs must be completed in July, and some varieties on this list will not be dug unless ordered. It is therefore Important that orders be sent in EARLY. A 5% discount in bulbs (my selection) will be given on all orders received before 31 July. Shipment of bulbs will be made early in September. Check with order please, or if desired they will be sent C. O. D.

Reference: Bank of Gloucester, Gloucester, Va.

PLANTING INSTRUCTIONS FOR DAFFODILS

The main requirement for success is a well drained soil. They are not happy in a wet spot where water will stand. Any good garden soil is ideal. Cow manure mixed in the soil at, or preferably before planting time, is ideal and will produce blooms and bulbs of unbelievable size. Bone meal is the only safe substitute to use at planting time. A top dressing of stable manure is always helpful during the winter months, serving also as a mulch. In the Middle Atlantic states plant bulbs deep enough so the neck of the bulb is covered with 3 or 4 inches of earth after the ground has settled. In the more Northern states 4 or 5 inches is desirable, while in the Southern states 2 or 3 inches is sufficient. Early planting is advisable so that the root system can develop before cold weather sets in. All questions pertaining to daffodils cheerfully answered.

THE DAFFODIL MART

NUTTALL—GLOUCESTER CO., VA.

* following a variety indicates it has won a coveted award at the famous English or Dutch daffodil shows.

QUALITY PRICES

On all varieties we give 12 bulbs for the price of 10 — 50 bulbs for the price of 40 — 100 bulbs for the price of 70. Example — Scarlet Leader, 1 bulb \$.40 — 12 bulbs \$4.00 — 50 bulbs \$16.00 — 100 bulbs \$28.00.

MIXTURES

SPECIAL NOVELTY — An unexcelled mixture containing over 500 of the truly distinctive varieties listed in this folder. By the law of averages you should get 40 to 50 and can get up to 100 varieties in 100 bulbs. Planted in a cutting bed they will give ample and diversified blooms for the home over a long period each spring. **ACTUALLY WORTH DOUBLE THE PRICE** **6.30 for 100**

REGULAR — Commercial varieties, mainly those listed by seed stores, also those used by greenhouses for forcing **5.60 for 100**

NATURALIZING — Only varieties which are adaptable to compete with nature in the wild state. Mixed — White - or Yellow **5.00 for 100**

ROCKERY — Small or miniature varieties suitable for Rock Gardens **each .10**

BUSHEL BARGAINS

If not on our mailing list write for DAFFODILS ON PARADE in July, a descriptive list of over 400 varieties, also comments on the 1952 blooming season; we will then have completed digging and know what we can offer in quantity by the bushel.

FALL BLOOMING BULBS

Shipped by us in June ONLY and should be planted immediately. Usually available in Seed Stores during October. Planted that late their chance of survival, especially in the north, is slim. Large plantings are to be seen at Colonial Williamsburg.

STERNBERGIA LUTEA — Large bright yellow crocus like flowers on 6 to 8 inch stems appear in mid September. \$2.50 per dozen.

LYCORIS RADIATA (Red Spider Lily) — Large circular clusters of bright red flowers on 2 foot spikes appear almost over night in mid September. A long lasting beautiful cut flower for the house, or a stunning item in the garden. The foliage appears in October and is a welcome spot of deep green in the garden all winter, disappearing in the spring. \$3.00 per dozen.

Both these items resent transplanting, especially if done at the wrong time, but will increase rapidly if left undisturbed. Radiata is especially touchy and care must be taken when digging not to break the thick fleshy roots which are never dormant, and take a year to replace if broken.

Allow 50 cents for postage unless order amounts to \$5.00 or over.

NEW VARIETIES (about 125) are emphasized by CAPITOL LETTERS. Those not readily identifiable under their regular classifications are listed below for your convenience.

Dwarf or Rockery types. Angie, Artic Morn, Beebop, Bobby-soxer, Bulb. Tenuifolius, Goldsithney, Halingy, Ivory Gate, Lobularis, Odorato, Phyllis Garth, Pulchellus, Queen Anne, Rip van Winkle, Rosedown, Rupicola, Tean, Watieri and Xit.

Pinks. Flush, Lorelei, Ping Blush and Roseana.

Former giant Leeds. Bellona, Cardigan Lagonda, Larne, Milk and Cream, Milkmaid.

Former small Leeds. Lough Areema.

If interested in Daffodils not appearing, write for quotations. We grow over 300 varieties which are omitted from this list.

We will gladly order copies of the DAFFODIL AND TULIP YEAR BOOK published by the Royal Horticultural Society in London each autumn, price \$2.25 per copy.

At the present time we have a small stock of the current R. H. S. Classified List of Daffodil Names, price \$1.25 each.

FRESH DAFFODIL BLOOMS

ORDER NOW

Available about March 10th through April. Cut in our fields one day, delivered to your home the next; no middle man, no delay. Double value in quality, quantity, unusual varieties, fresher and longer lasting flowers. These NOVELTY BOXES contain 12 dozen (144) flowers in 12 distinctly different types. Growing over 1300 varieties from which to select, customers who order boxes at weekly intervals seldom get any duplications throughout the season. Unless blooms are wanted at a particular time or date we suggest you mark orders "AT BEST". This will allow us to send when we have the finest selection of blooms and when the varied spring weather is just "Right" for shipping. We guarantee delivery of blooms in good shape to any point east of Chicago and no further south than Savannah. For those who desire these beautiful flowers sent to more distant points, Air Mail has proven the solution, but we must bill you for the extra postage involved. These boxes of exquisite blooms make unexcelled gifts for Easter or other special occasions. They are sent Special Delivery and are insured against delay in transit.

PRICE — delivered ----- \$4.50 per box

To satisfy a growing demand for NAMED COLLECTIONS of Daffodil blooms we will fill orders for NOVELTY BOXES containing NAMED collections of 24 varieties, 6 blooms of each variety correctly labeled.

PRICE — including Special Delivery ----- \$6.00 per box

Collections of single specimen blooms, 10 cents each provided order amounts to at least \$5.00. Garden Clubs and lecturers find these most useful and instructive at their early spring meetings. Garden Clubs may deduct the price of their specimen blooms from their bulb order provided it amounts to over \$50.00.

LABELS FOR DAFFODIL PLANTINGS. We have what we consider the IDEAL label. The 3½ by 1 inch zinc name plate has 4 holes through which the two 12 inch aluminum wire legs are inserted. The name plate can never come loose. If names are written on with weatherproof pencil they remain legible for at least 2 years.

Price per doz. postpaid ----- \$1.75

VASES FOR DAFFODIL BLOOMS. Anyone who has ever tried to arrange these flowers in the ordinary flower container knows how difficult it is to get them in the right position and then make them stay put. In Colonial Williamsburg we found an 18th Century vase which is IDEAL. Not too tall, nor too wide at the rim or too narrow at the bottom. A famous Potter at Williamsburg copied it for us. They are shaped by hand on a Potters wheel from the famous clays found at Jamestown and Williamsburg and are finished with a hard clear glaze of Daffodil green. A smaller vase was designed to hold from 1 to 3 specimen blooms, while the larger size is ideal for up to a dozen flowers.

PRICE — Small, \$1.00 each — Large \$1.50 each — Postpaid.

REVISED SYSTEM FOR THE CLASSIFICATION OF DAFFIDOLS

Effective on and after 1 January, 1950.

i) "Colored" means yellow or some color other than white.

(ii) "White" means white or whitish.

(iii) The length of a perianth segment is the extreme length measured on the inside from its junction with the corona along the midrib to the extreme tip. The length of the corona is the extreme length measured from its junction with the perianth to the end of its furthest extension when the edge is flattened out.

DIVISION I. Trumpet Narcissi of Garden Origin. One flower to a stem; Trumpet or Corona as long or longer than the perianth segments.

(a) Perianth colored; Corona colored, not paler than perianth.

(b) Perianth white; Corona colored. (c) Perianth white; Corona white, not paler than perianth. (d) Any color combination not falling into a, b or c.

DIVISION II Large cupped Narcissi of Garden Origin. One flower to a stem; Cup or Corona more than one third, but less than equal the length of the perianth segments.

(a) Perianth colored; Corona colored, not paler than perianth.

(b) Perianth white; Corona colored. (c) Perianth white; Corona white, not paler than perianth. (d) Any color combination not falling into a, b or c.

DIVISION III. Small-Cupped Narcissi of Garden Origin. One flower to a stem; Cup or Corona not more than one third the length of perianth segments.

(a) Perianth colored; Corona colored, not paler than perianth.

(b) Perianth white; Corona colored. (c) Perianth white; Corona white, not paler than perianth. (d) Any color combination not falling into a, b or c.

DIVISION IV. Double Narcissi of Garden Origin. Double flowers.

DIVISION V. Triandrus Narcissi of Garden origin. Characteristics of Triandrus clearly evident. (a) Cup or corona not less than two thirds the length of the perianth segments. (b) Cup or corona less than two thirds the length of the perianth segments.

DIVISION VI. Cyclamineus Narcissi of Garden origin. Characteristics of cyclamineus clearly evident. (a) Cup or corona not less than two thirds the length of the perianth segments. (b) Cup or corona less than two thirds the length of the perianth segments.

DIVISION VII. Jonquilla Narcissi of Garden Origin. Characteristics of any of the Jonquilla group clearly evident. (a) Cup or corona not less than two thirds the length of the perianth segments. (b) Cup or corona less than two thirds the length of the perianth segments.

DIVISION VIII. Tazetta (Poetaz) Narcissi of Garden Origin. Characteristics of any Tazetta group clearly evident.

DIVISION IX. Poeticus Narcissi of Garden origin. Characteristics of the Poeticus group without admixture of any other.

DIVISION X. Species and Wild Forms and Hybrids. All species and wild, or reputedly wild, forms and hybrids.

DIVISION XI. Miscellaneous Narcissi. All Narcissi not falling into any of the foregoing Divisions.
